

## **IDCA – kirjallisuusviitteet**

Solimena M et al., Autoantibodies directed against GABAergic nerve terminals in a patient with stiff-man syndrome, epilepsy, and type I diabetes mellitus. *N Engl J Med* 318: 102 – 1020, 1988

Klockgether T et al., Idiopathic cerebellar ataxia of late onset: natural history and MRI morphology. *J Neurol, Neurosurg and Psychiatry* 53: 297 – 305, 1990

Staal A et al., Non-familial degenerative disease and atrophy of brainstem and cerebellum. Clinical and CT data in 47 patients. *J Neurological Sci* 95: 259 – 269, 1990

Harding AE: Ataxic disorders. Kirjassa: *Neurology in clinical practice*, 337 – 346. Toim. WG Bradley, RB Daroff, GM Fenichel and CD Mardsen. Butterworth-Heinemann, Boston 1991(a)

Harding AE: Cerebellar and spinocerebellar disorders. Kirjassa: *Neurology in clinical practice*, 1603 – 1623. Toim. WG Bradley, RB Daroff, GM Fenichel and CD Mardsen. Butterworth-Heinemann, Boston 1991(b)

Wüllner U et al., Magnetic resonance imaging in hereditary and idiopathic ataxia. *Neurology* 43: 318 – 325, 1993

Marbini A et al., Hereditary sensory and autonomic neuropathy with ataxia and late onset. *Clinical Neurology and Neurosurgery* 96: 191 – 196, 1994

Gilman S and Quinn NP: The relationship of multiple system atrophy to sporadic olivopontocerebellar atrophy and other forms of idiopathic late-onset cerebellar atrophy. *Neurology* 46: 1197 – 1199, 1996

Kaakkola S ja Rinne R: Ataksiat ja niiden erotusdiagnostiikka (katsaus). *Duodecim* 113: 1773 – 1782, 1997

Klockgether T: Clinical approach to ataxic patients. Kirjassa: *Handbook of Ataxia Disorders*, 101 - 114. Ed. T Klockgether, Marcel Dekker Inc., New York-Basel, 2000

Pellecchia MT et al., Cerebellar ataxia associated with subclinical celiac disease responding to gluten-free diet. *Neurology* 53: 1606 – 1608, 1999

Gilman S et al., Evolution of sporadic olivopontocerebellar atrophy into multiple system atrophy. *Neurology* 55: 527 – 532, 2000

Mitoma H et al., Presynaptic impairment of cerebellar inhibitory synapses by an autoantibody to glutamate decarboxylase. *J Neurol Sci* 175(1): 40 – 44, 2000

Perlman SL: Cerebellar Ataxia. *Current treatment options in neurology* 2: 215 – 224, 2000.

Timmann-Braun D and Diener H-C: Alcoholic cerebellar degeneration (Including Ataxias That Are Due to Other Toxic Causes). Kirjassa: *Handbook of Ataxia Disorders*, 571 – 605. Ed. T Klockgether, Marcel Dekker Inc., New York-Basel, 2000

Schöls L et al., Genetic background of apparently idiopathic sporadic cerebellar ataxia. *Hum Genet* 107: 132 – 137, 2000.

Gomez CM: Inherited Cerebellar Ataxias. Kirjassa: *Current Therapy in Neurologic Disease*, 6<sup>th</sup> edition. St. Louis: Mosby. Toim: Johnson RT et al., sivut 292 – 298, 2001

Honorat J et al., Cerebellar ataxia with anti-glutamic acid decarboxylase antibodies. Study of 14 Patients. Arch Neurol 58: 225 – 230, 2001

The Huntington's Disease Study Group: A randomized, placebo-controlled trial of coenzyme Q10 and remacemide in Huntington's disease. Neurology 57: 397 – 404, 2001

Meinck HM et al., Antibodies against glutamic acid decarboxylase: prevalence in neurological diseases. J Neurol Neurosurg Psych 71 (1): 100 – 103, 2001

Abele M et al., The aetiology of sporadic adult-onset ataxia. Brain 125 (Pt5): 961 – 968, 2002

Mori M et al., Double-blind crossover study of branched-chain amino-acid therapy in patients with spinocerebellar degeneration. J Neurol Sci 195: 149 – 152, 2002

Osaki Y et al., Do published criteria improve clinical diagnostic accuracy in multiple system atrophy? Neurology 59: 1486 – 1491, 2002

Shiga Y et al., Transcranial magnetic stimulation alleviates truncal ataxia in spinocerebellar degeneration. J Neurol Neurosurg Psy 72: 124 – 126, 2002

Vianello M et al., Glutamic acid decarboxylase autoantibodies and neurologic disorders. Neurol Sci 23 (4): 145 – 151, 2002

Hadjivassiliou M et al., Gluten ataxia in perspective: epidemiology, genetic susceptibility and clinical characteristics. Brain 126 (3): 685 – 691, 2003
