

SCA-sairaudet - kirjallisuusviitteet

Rosenberg RN (Ed): Autosomal dominant cerebellar phenotypes: The genotype will settle the issue. *Neurology* 40: 1329 – 1331, 1990

Harding AE: Ataxic disorders. Kirjassa: *Neurology in clinical practice*, 337 – 346. Toim. WG Bradley, RB Daroff, GM Fenichel and CD Mardsen. Butterworth-Heinemann, Boston 1991(a)

Harding AE: Cerebellar and spinocerebellar disorders. Kirjassa: *Neurology in clinical practice*, 1603 – 1623. Toim. WG Bradley, RB Daroff, GM Fenichel and CD Mardsen. Butterworth-Heinemann, Boston 1991(b)

Orr HT et al: Expansion of an unstable trinucleotide CAG repeat in spinocerebellar ataxia type 1. *Nat Genet* 4: 221 – 226, 1993

Giunti P et al.: The trinucleotide repeat expansion on chromosome 6p (SCA1) in autosomal dominant cerebellar ataxias. *Brain* 117: 645 – 649, 1994

Rosenberg RN (Ed): Autosomal dominant cerebellar phenotypes: The genotype has settled issue. *Neurology* 45: 1 – 5, 1995

Rosenberg RN (Ed): Spinocerebellar ataxias and ataxins. *New England J Med* 333 (20): 1351 – 1352, 1995

Burk K et al.: Autosomal dominant cerebellar ataxia type I. Clinical features and MRI in families with SCA1, SCA2 and SCA3. *Brain* 119: 1497 – 1505, 1996

Kaakkola S ja Rinne R: Ataksiat ja niiden erotusdiagnostiikka (katsaus). *Duodecim* 113: 1773 – 1782, 1997

Grewal RP et al.: Clinical and genetic analysis of a distinct autosomal dominant spinocerebellar ataxia. *Neurology* 51: 1423 – 1426, 1998

Klockgether T and Evert B: Genes involved in hereditary ataxias. *Trends Neurosci* 21: 413 – 418, 1998

Klockgether T et al.: The natural history of degenerative ataxia: a retrospective study in 466 patients. *Brain* 121: 589 – 600, 1998

Moseley ML et al.: Incidence of dominant spinocerebellar and Friedreich triplet repeats among 361 ataxia families. *Neurology* 51: 1666 – 1671, 1998

Schöls L et al.: Sleep disturbance in spinocerebellar ataxias. Is the SCA3 mutation a cause of restless legs syndrome? *Neurology* 51: 1603 – 1607, 1998

Subramony SH and Nance M: Diagnosis and management of the inherited ataxias. *The Neurologist* 4: 327 – 338, 1998

Schöls L et al., Genetic background of apparently idiopathic sporadic cerebellar ataxia. *Hum Genet* 107: 132 – 137, 2000

Storey E et al., Frequency of spinocerebellar ataxia types 1, 2, 3, 6, and 7 in Australian patients with spinocerebellar ataxia. *Am J Med Genet* 95: 351-357, 2000

Tang B et al.: Frequency of SCA1, SCA2, SCA3/MJD, SCA6, SCA7, and DRPLA CAG trinucleotide repeat expansions in patients with hereditary spinocerebellar ataxia from Chinese kindreds. *Arch Neurol* 57: 540 – 544, 2000

Srivastava AK et al., Molecular and clinical correlation in five Indian families with spinocerebellar ataxia 12. *Ann Neurol* 50: 796-800, 2001

Subramony SH and Filla A (Ed): Autosomal dominant spinocerebellar ataxias ad infinitum? *Neurology* 56: 287 – 289, 2001

Margolis RL: The spinocerebellar ataxias: Order emerges from chaos. *Curr Neurol and Neurosci Rep* 2: 477 – 456, 2002

Perlman SL: Spinocerebellar degeneration: an update. *Curr Neurol Neurosci Rep* 2: 331 – 341, 2002

Silveira I et al., Trinucleotide repeats in 202 families with ataxia. A small expanded (CAG)_n allele at the SCA17 locus. *Arch Neurol* 59: 623 – 629, 2002

Bang OY et al., Clinical and neuroradiological features of patients with spinocerebellar ataxias from Korean kindreds. *Arch Neurol* 60: 1566-1574, 2003

Bryer A et al., The hereditary adult-onset ataxias in South Africa. *J Neurol Sci* 216: 47-54, 2003

Bürk K et al., Cognitive deficits in spinocerebellar ataxia type 1, 2, and 3. *J Neurol* 250: 207 – 211, 2003

Okamoto K et al., MR features of diseases involving bilateral middle cerebellar peduncles. *Am J Neuroradiol* 24: 1946 – 1954, 2003

Brusco A et al., Molecular genetics of hereditary spinocerebellar ataxia. Mutation analysis of spinocerebellar ataxia genes and CAG/CTG repeat expansion detection in 225 Italian families. *Arch Neurol* 61: 727 – 733, 2004

De Michele G et al., A pathogenetic classification of hereditary ataxias: Is the time ripe? – *J Neurol* 251: 913-922, 2004

Della NR et al., ADC mapping of neurodegeneration in the brainstem and cerebellum of patients with progressive ataxias. *Neuroimage* 22: 698 – 705, 2004
